

Bit-Z ECOLOGY

ONE. About Bit-Z Exchange

1. Introduce

Bit-Z, established in Hong Kong in December 2016, is one of the most popular digital assets trading exchanges, providing professional digital asset trading and OTC (Over The Counter) services. Now, Bit-Z listed over 100 tokens and over 140 trading pairs, with over 1 million registered users and over 250,000 online traders for 24 hours.

2. Strength

2.1 Technical architecture

Bit-Z Exchange has adopted a global AAA-level protection system for the underlying technical architecture. It invested a large amount of funds in talents and technical support, and established security risk funds to resist risk events such as hacker attacks, contract loopholes, and system abnormalities.

1) Technical protection

Use bank-level SSL secure links to ensure transaction security;

2) Platform stability

GSLB and distributed servers ensure the stability of the platform;

3) Effective trading

Use the trading engine to carry transactions up to 50,000 per second. It can meet the need for fast deposit and withdrawal, deposit at the fastest speed, small withdrawal of digital assets, and payment within 5 minutes.

2.2 Prominent Position

According to CoinMarketCap real-time data in May 2018, Bit-Z's 24H trading volume exceeded US\$300 million, ranking 7th in the world. In June 2018, Tokeninsight, the professional assessment agency, ranks Bit-Z as BBB, ranking fourth in the world. Bit-Z first initiated Vote for Launch, that opened a currency listing mechanism, voting, among the whole world. Bit-Z has always been renowned in the industry.

2.3 Capital Support

In December 2017, Bit-Z received Cyanhill Capital Limited, Wa Sung Investment Limited, Plum Angel Investment Co.Ltd. for over US\$10 million in investment. Up to now, Bit-Z Exchange has a valuation of 500 million U.S. dollars.

2.4 Team Strength

Bit-Z team includes top talent from the international digital currency industry, as well as diversified professionals in various fields such as finance, social networking, games, and electric commerce.

Bit-Z CEO, Jack, former Co-founder and CTO of Yuanbao.

In 2013, Jack entered the blockchain field. As a early developers of blockchain technology, Jack focuses on the layout of blockchain quality assets and invests in high quality blockchain projects.

In September 2017, Jack joined Bit-Z as an investor and served as CEO, and began to fully take over the platform business.

Within three months, the company quickly completed a series of important issues including brand upgrade, global strategic layout, million-dollar financing including Cyanhill Capital Limited, Wa Sung Investment Limited and Plum Angel Investment Co.Ltd.. Jack has always been committed himself to making Bit-Z an industry unicorn.

During his tenure, Jack pioneered the voting modal and introduced the DKKT trading area for the platform. Jack led Bit-Z into the world's top seven in CoinMarketCap, world's top four in Tokeninsight Ranking within a short time, making Bit-Z Exchange have a valuation of 500 million U.S. dollars.

Up to now, Bit-Z Group's revenue exceeded 500 million yuan, profits exceeded 400 million yuan, and the number of employees worldwide is nearly 200.

Bit-Z COO, Grace, former Vice President of Guoruitai Holding Company and COO of Qianbaojinfu.

Grace is the sponsor of the Data Growth Hacking Project. She once visited Waseda University in Japan and is familiar with overseas markets. Grace has been engaged in financial product operations and data management operations for eight years.

Grace was responsible for the investment growth of listed company's wealth management projects, and set an increase of 60 million records in 24 hours, an increase of 76.2% of customers within one quarter.

Grace initiated 31 financial real estate projects in Japan. Grace's Kyoto Project broke the record of 2 million financing for one minute, and her Ginza ABS Project broke the financing record of 11.4 million in three days.

3. Vision

Bit-Z team is committed to building an international leading blockchain asset trading platform, always supporting the development of mainstream digital currencies, and giving decision-making power to the market and community traders.

Bit-Z provides systematic support for the development and ecological balance of the underlying technology of the blockchain. To promote the globalization of the blockchain and

provide users with stable and secure transaction services is always the Bit-Z Exchange's primary vision.

4. Group Strategy Upgrade

After two years' exploration and development, Bit-Z Exchange has completed group strategy upgrade in June 2018 and has set up branches in ten countries and regions including Singapore, Japan, South Korea, Russia and Denmark. Bit-Z put hundreds of millions yuan into global node support. The upgrade involves the group's ecological system packaging and new branches of the original business, which aims to promote the global blockchain ecological construction.

Among them, Bit-Z Strategic Investment Department, Media Research Institute, Ecological Incubation Department and Project Review Center were launched for the first time as brand-new businesses. The group's business territory is worth looking forward to. This group upgrade will start the first battle of the whole platform eco-business. In the future, it will continue to publish industry actions in terms of underlying technology incubation and support of blockchain, closed-loop of the group's ecological development, and review of projects.

Bit-Z platform token will also become a key branch of the group's strategic layout, which will help the group's global business move towards a sustainable and stable development path.

TWO. BZ

BZ is the ecological token issued by Bit-Z Exchange, abbreviated as BZ. It does not publicly raise funds from investors. The initial stage of BZ is based on the Ethereum ERC20 agreement. In the future, the BZ main net will establish more ecological models to boost the development of the platform. Based on the global eco-development plan of the Bit-Z Group, BZ will have good asset value preservation, expected value-added space, and stable market liquidity. The value space of BZ can be imagined. BZ is bringing a series of ecological core welfare benefits to the Bit-Z Group.

1. Currency Supply

BZ has a total issuing amount of 1.2 billion and will not be increased.

2. Allocation Scheme/Release Rule

1) Early Co-Founder Fund:

10% of the total, used to constantly improve the BZ technical framework to always support the mainstream digital currencies optimization and development.

Release Rule: Start from the second year (It takes 4 years to release.)

2) Security Risk Control Fund:

10% of the total, used for platform security risk control reserve, and will pay for accidents caused by hacker attacks, contract loopholes, and system anomalies.

Release Rule: Immediately release respond to problems (following the official announcement)

3) Group's Ecological Construction Fund:

20% of the total, used in the ecological construction of Bit-Z Group to support the optimization and upgrading of the group's strategies and to constantly improve the group's ecological construction.

Release Rule: Start from the first year (It takes 4 years to release.)

4) Group Operating Fund:

10% of the total, used for group market operations and benefit sharing.

Release Rule: Start from the first year (It takes 4 years to release.)

5) Platform Dividend Fund:

50% of the total, used for global partners to share a new model of dividends. Bit-Z defines one million users as its partners, and is committed to building the world's largest trading platform, and always works with users to promote the new development of global blockchain ecological construction.

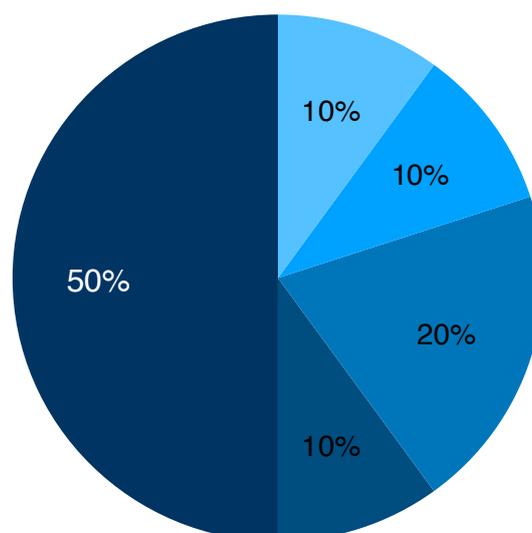

Release Rule: Start from the first year (Gradually release.)

Special Note:

1) The total amount of BZ is 1.2 billion, which will never be increased. There is no private equity quota to protect the ecological development of the Bit-Z Group. Bit-Z puts perspective on industry health and platform self-discipline. BZ minimizes the participation threshold for global partners and creates a new economy for welfare sharing.

2) BZ employs third-party data disclosure agencies to share data to global partners in real-time. BZ is committed to creating a fully transparent circulation mechanism.

● Early Co-Founder Fund ● Security Risk Control Fund ● Group's Ecological Construction Fund
● Group Operating Fund ● Platform Dividend Fund

THREE. BZ Application Scenarios

1. Global Partner Dividend Sharing

Bit-Z contributes 50% of BZ(600 million) to its global partner's share of dividend distribution, through "trading mining". After completing mining, Bit-Z Exchange will enter the BZ ecologically sustainable maintenance phase.

Participation Mechanism :

1) Bit-Z will open "Trading Mining" on June 25, 2018, with a limit of 600 million BZ.

2) Each period is limited to 10 million BZ, gradually released, and the return percentage of transaction fee will be reduced by 3% after each period are completed.

For example:

In the first phase of 10 million BZ mining, 100% transaction fee will be refunded in the form of equivalent BZ;

In the second phase of 10 million BZ mining, 97% transaction fee will be refunded in the form of equivalent BZ;

And so on, gradually decreasing.

3) At the same time of mining, Bit-Z will promote the opening of BZ trading according to the mining power of the entire network;

4) Before opening BZ trading, Bit-Z will return the transaction fee according to the formula in (2); and return the transaction fee 100% in accordance with BZ real-time quote price after opening BZ trading;

5) Price calculation:

Before opening BZ trading:

1BZ = 0.158 USDT

1BZ = 1 DKKT

1BZ = (0.158 / BTC whole network price) BTC

After opening BZ trading: BZ Real-time Quoted Price

Special Note:

1. Bit-Z will evaluate all currencies and continuously pick high-quality trading pairs to open mining.

2. Bit-Z will restrict accounts with transaction fee discount to participate in mining, in order to release the welfare extremely to the majority of traders.

3. Bit-Z will restrict the API mining behavior, and the limit of pending orders will be dynamically adjusted according to the trading power of the entire network.

2. Global Partners Sustainable Development

Bit-Z contributes 50% of BZ(600 million) to its global partner's share of dividend distribution, through "trading mining". After completing mining, Bit-Z Exchange will enter the BZ ecologically sustainable maintenance phase.

Participation Mechanism :

1) BZ global partners can enjoy Bit-Z's profit distribution every quarter. The proportion of dividends will increase by 5% per year and the upper limit is 35%.

Year	1	2	3	4
Dividend Proportion	20%	25%	30%	35%	35%

a. After the mining, the quarterly dividends are calculated after a natural month (for example, if the mining is completed on January 5, 2019, the dividend calculation cycle for the first quarter is from February 1, 2019 to April 30, 2019).

b. BZ global partners will get Bit-Z's profit distribution according to BZ holding amount.

2) BZ global partners can enjoy the transaction fee deduction.

a. After completing mining, BZ holders can choose to pay the transaction fee with BZ while trading on Bit-Z;

b. When BZ offsets the transaction fee, the offset ratio will be adjusted from 30% to 80% according to the operation rules.

3. Global Partners VIP Privilege Service

Bit-Z contributes 50% of BZ(600 million) to its global partner's share of dividend distribution, through "trading mining". After completing mining, Bit-Z Exchange will enter the BZ ecologically sustainable maintenance phase.

Participation Mechanism :

1) After completing mining, global partners can get VIP service according to the locked position.

2) After completing mining, according to the locked position, global partners can get advanced quality currency purchase rights based on Bit-Z's plan.

3) After completing mining, according to the locked position, global partners can get double activity award based on Bit-Z's plan.

4. Global Partners Node Team Quota

Bit-Z contributes 50% of BZ(600 million) to its global partner's share of dividend distribution, through "trading mining". After completing mining, Bit-Z Exchange will enter the BZ ecologically sustainable maintenance phase.

Participation Mechanism :

Global recruitment of operating partners who can participate in Bit-Z super-nodes to get encouraging bonus while enjoying the same benefits and rights of the Bit-Z founding team.

Requirements for entry:

1) Adequate team members and team appeal;

2) Strong team operational capabilities and ecological maintenance awareness.
